1430-1530 Presentation by Phil Horton.

1530-1600 Tea and biscuits; informal questions and discussion.

**Inclusive cost:
£14.50 per person**

RSA MANIFESTO OBJECTIVES MET IN THIS EVENT

Encouraging enterprise

- This project shows how sustainable technologies can work within a developing knowledge-based economy which encourages indigenous enterprise as an emerging solution following the decline of traditional steel and coal industries in Wales.
- The partnering contract model brings all contractors, designers and specialist consultants on board at an early stage.

Fostering resilient communities

- Explores the complex interaction between land use, energy, food production, buildings, transport, waste management and people.
- Uses biomass heat and power linked to a district heating system

Advancing global citizenship

- The institute is designed to help businesses to acquire the sustainable development skills necessary to meet the challenge of carbon dioxide emission cuts.

Moving towards a zero-waste society

- Buildings using basic principles of super-insulation, passive solar design, air-tight construction and natural, controlled ventilation with minimal waste during manufacture and construction

Developing a capable population

- Teaching and accommodation facilities in which students and conference participants learn about a wide range of sustainable development issues.

Booking Send to: Tony Bamber, Coed Ceirios, Cilcennin, Lampeter, Ceredigion, SA48 8RR.

Please reserve.....places for *Wise in Wales* @ £14.50 per person. I enclose cheque for £.....payable to RSA Western Region and a stamped self-addressed envelope (A4 or A5 please).
