We invite you to brain-storm and take forward in an informal atmosphere current and new ideas for future activities in the Region. There is a real resurgence of regional activity (see for more information www.rsawaw.org), most recently the very successful “A Severn Barrage or What?” public forums in Bristol and Cardiff on options for obtaining tidal energy from the Severn Estuary, the outcomes of which are being fed into the DECC Public Consultation.

The Region is very anxious to build on these successes and to use our resources to encourage and support our Fellows in contributing to our future programme in developing your own activities and in working in partnership with other Fellows in the region. Areas of clear relevance are related to education, environment and sustainability, energy and engineering, the arts, science in society, health, current affairs, our locality, business etc, but any area which interests you is of interest to the RSA.

We look forward very much to welcoming you, your ideas and comments on 6 May.

Eric Albone, Chair, RSA Wales and Western Region

The Forum is for Fellows only. No charge, but pre-booking by 30th April essential for catering! Buffet cannot be guaranteed for later bookings. Please complete and return the response form below as soon as possible.
